

Hysterectomy

A hysterectomy is a surgery to remove a woman's uterus. The uterus is one of the organs of the female reproductive system and is about the size of a closed hand. You can no longer have children after you have your uterus removed, and you will no longer have periods (menstruate). If your ovaries are not removed, you will continue to make female hormones. If your ovaries are removed, menopause will occur.

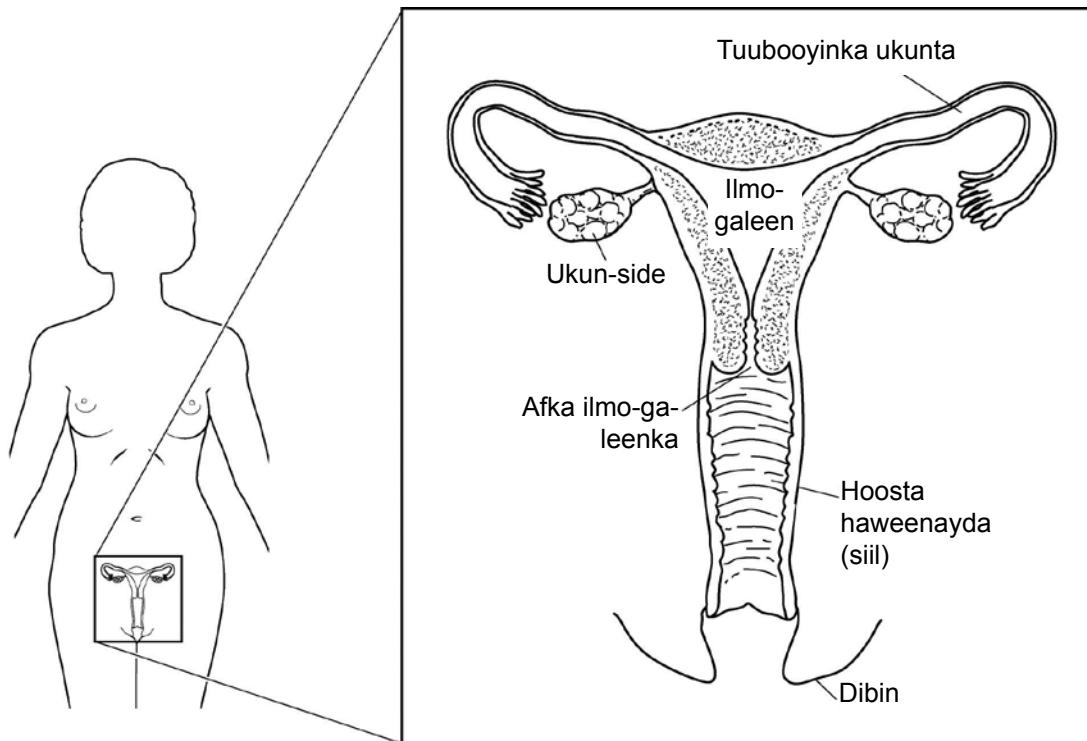

There are different types of hysterectomy surgeries. Ask your doctor what type of surgery you are having and if your cervix, tubes and ovaries are being removed.

- **Vaginal hysterectomy** – the uterus is removed through the vagina. No incision in the abdomen is needed.
- **Abdominal hysterectomy** – the uterus is removed through an incision in the abdomen.

Saaridda Ilmo-galeenka

Saaridda ilmo-galeenku/makaanka (hysterectomy) waa qalitaan lagu saaro ilmo-galeenka/makaanka haweenayda. Ilmo-galeenku/makaanku waxa uu ka tirsan yahay xubnaha habka taranka ee dhedigga waxana uu la cabir yahay qiyaastii tantoomo ama gacan la duubay. Marka lagaa saaro ilmo-galeenka ma dhali doontid caruur, mana yeelan doontid caado ama dhiig caado. Haddii aan lagaa saarin ukun-sideyaasha, waxa kuu sii socon doona sameynta dheecanada (hormones) dhedigga. Haddii lagaa saaro ukun-sideyaasha, waxa iman doona joogsi caado-dhiig.

Waxa jira noocyoo kala duwan oo ah qalitaano oo loo saaro ilmo-galeenka. Weydii dhakhtarkaaga nooca qalitaan ee laguu sameynayo iyo in la saarayo afka ilmo-galeenkaaga/makaanka, tuubooyinkaaga iyo ukun-sideyaashaada.

- **Vaginal hysterectomy** – ilmo-galeenka/makaanka waxa laga saaraa hoosta haweenayada. Looma baahna in caloosha meel laga jeexo.
- **Abdominal hysterectomy** – ilmo-galeenka waxa laga saaraa meel laga jeexo caloosha.

- **Laparoscopic hysterectomy** – several small incisions are made in the abdomen and the doctor works through these small incisions using a laparoscope. This instrument makes it easier for the doctor to see small areas during surgery. Other small instruments are used to detach and remove the uterus.
 - ▶ **Robotic hysterectomy** – It is very similar to a laparoscopic hysterectomy. Instruments are more flexible and the doctor uses a special camera to guide the instruments during surgery.

To Prepare

- Tell your doctor all the medicines you are taking. Be sure to include any prescription or over the counter medicines, vitamins and herbs.
 - ▶ You may be told not to take aspirin or ibuprofen (Advil, Motrin) for a few days before your surgery. **If you take aspirin daily**, do not stop taking it without asking your doctor first.
 - ▶ **If you are taking blood thinners or medicines to prevent clots**, check with the doctor who prescribed the medicine to see if you should stop the medicine before surgery.
- Ask your doctor if you should take your medicines the morning of your surgery. If so, take them with small sips of water only.
- **Do not eat or drink anything**, including water, after midnight before your surgery.
- If you have any allergies to medicines, foods or other things, tell the staff before your surgery.
- An adult family member or friend will need to take you home when you leave the hospital. It is not safe for you to drive or leave alone.

- **Laparoscopic hysterectomy** – jeexitaano yaryar oo dhawr ah ayaa lagu sameeyaa caloosha waxaanu dhakhtarku ku dhex shaqeeya jeexitaanada yaryar isaga oo isticmaala qalab la yidhaahdo laparoscope. Qalabkani waxa uu dhakhtarka u fududeynayaa inuu arko aagag yaryar inta lagu jiro qalitaanka. Qalab kale oo yaryar ayaa la isticmaalaa si loo soo gooyo oo loo saaro ilmo-galeenka.
 - ▶ **Robotic hysterectomy** – Wuxuu aad ugu eg yahay laparoscopic hysterectomy. Qalabku waa mid sii jilicsan waxana uu dhakhtarku isticmaalaa kamarad gaar ah si loo hago qalabka inta lagu jiro qalitaanka.

Si Diyaar Loo Noqdo

- U sheeg dhakhtarkaaga dhammaan dawooyinka aad qaadatid. U hubso inaad ku dartid wixii ah dawooyin laguu qoray ama dawooyin aad iibsatay warqad la'aan, fitamiino iyo dhir.
 - ▶ Wuxa laga yaabaa in laguu sheego in aanad qaadan asbiriin ama ibuprofen (Advil, Motrin) dhawr maalmood qalitaankaaga ka hor. **Haddii aad maalin kasta qaadatid asbiriin**, ha joojin adiga oo aan marka hore weydiin dhakhtarkaaga.
 - ▶ **Haddii aad qaadatid dhiig khafiifyeyaal ama dawooyin ka hortaga xinjiraha**, weydiin dhakhtarka kuu soo qoray dawada si aad u ogaatid in la rabo inaad joojiso dawada ka hor qalitaanka.
- Weydiin dhakhtarkaaga haddii la rabo inaad qaadatid dawooyinkaaga subaxa qalitaankaaga. Haddii sidaa la rabo, ku qaado iyaga kaliya kabashooyin yaryar oo biyo ah.
- **Wax ha** cunin hana cabin, waxana ka mid ah biyaha, wixii ka dambeeya habeen-badhka ka horeeya qalitaankaaga.
- Haddii aad wax ah alerjiyo/diidmooyin ama xasaasiyado ah u leedahay dawooyin, cunto ama waxyaabo kale, u sheeg shaqaalah ka hor qalitaanka.
- Qof weyn oo ka tirsan elhelka am saaxiib ah ayaa loo baahan doonaa oo guriga ku geeya marka aad ka soo baxdid cisbitaalka. Ammaan kuuma aha in aad baabuur kaxeysid ama kaligaa soo baxdid.

During Surgery

- You will wear a hospital gown.
- An IV (intravenous) tube is put in a vein in your arm for giving medicines and fluids.
- You will be taken on a cart to the operating room and then helped onto a table.
- Medicine is given in your IV to keep you asleep and free from pain.
- You will have a catheter that drains urine from your bladder. This tube is often removed the morning after your surgery.
- Another tube may be put in through your nose and is passed down to your stomach to remove fluids so that you will not feel sick to your stomach. This tube is often taken out before you leave the recovery room.
- The surgery area or abdomen is cleaned.
- Your uterus is removed. Your cervix, tubes and ovaries may also be removed.
- Any incisions are closed with stitches, staples or special tapes called steri-strips.
- A bandage is put over the incisions.

After Surgery

In the Hospital

- You are taken to the recovery room where you are watched closely until you wake up and are doing well.
- Your breathing, blood pressure and pulse are checked often.

Inta Qalitaanku Socdo

- Waxa aad u baahan doontaa inaad gashatid marada cisbitaalka.
- Tuubo la galinayo xidid/faleebo (IV) ayaa la galin doonaa xidid dhiig oo ku yaala gacantaada si laguu siiyo dawooyin iyo dheecaano.
- Waxa lagugu qaadi doonaa sariir taasoo lagugu geyn doono qolka qalitaanka ka dibna waxa lagugu wareejin doonaa miis.
- Dawo ayaa lagaa siin doonaa tuubada kugu jirta (IV)/faleebada si laguu seexiyo oo aadan u dareemin xanuun.
- Waxa lagu galin doonaa tuubo kaadida ka gororinaysa kaadi-haystaada. Tuubadan waxa badanaa la saaraa subaxa ku xiga qalitaankaaga.
- Tuubo kale ayaa laga yaabaa in sinka lagaa galiyo oo loo gudbiyo calooshaadaa si dheecaano loo soo saaro si aadan u lallaboon. Tuubadan waxa badanaa la saaraa ka hor inta aadan ka bixin qolka soo-fiicnaanta.
- Goobta qalitaanka ama caloosha ayaa la nadiifyaa.
- Ilmo-galeenkaaga/makaankaaga ayaa la saari doonaa. Waxa kale oo laga yaabaa in afka ilmo-galeenka, tuubooyinkaaga iyo ukun-sideyaashaada la saaro.
- Wixii ah jeexitaano waxa lagu xidhi doonaa tolmo, qabatooyin ama dhejisyo/sharooto gaar ah oo loo yaqaano “steri-strips”.
- Faashad ayaa la saari doonaa meesha la qalay.

Qalitaanka Ka Dib

Gudaha Cisbitaalka

- Waxa lagu geyn doonaa qolka soo-fiicnaanta halkaasoo si aad ah laguugu ilaalin doono ilaa aad ka soo toosaysid oo aad ka soo ficnaanaysid.
- Waxa marrar badan la firin doonaa neefsashadaada, cadaadiska dhiigga iyo garaaca wadnaha.

- If you are staying at the hospital, you will be taken to your room.
- A pad will be placed between your legs in case you have vaginal bleeding.
- You also may have special stockings on your legs while you are in bed to help prevent blood clots.
- The staff may teach you how to cough, deep breathe and use an incentive spirometer. An incentive spirometer is a device used to help you take deep breaths. These exercises help open the airways of the lungs and prevent pneumonia. If you have abdominal incisions, place a pillow or a folded blanket over your incisions for support when deep breathing or coughing. Do these exercises every 1 to 2 hours while you are awake.
- You will be given medicine to control your pain. Tell your nurse if you have pain.
- The IV is used to give you medicine and fluids until you are able to eat and drink well. You may be given a few ice chips if you are not sick to your stomach.
- You will be given clear liquids at first and then slowly progress to regular foods.
- Your bandage will be removed the day after surgery. Your incision may have:
 - ▶ Stitches that dissolve on their own.
 - ▶ Staples which are often taken out a few days after surgery.
 - ▶ Steri-strips that come off on their own in 7 to 10 days.

- Haddii aad joogaysid cisbitaalka, waxa lagu geyn doonaa qolkaaga.
- Kuus suuf ah ayaa la galin doonaa lugahaaga dhexdooda kaasoo loogu talogalay haddii hoosta uu dhiig kaa socdo.
- Waxa kale oo laga yaabaa in laguu galiyo sharabaad ama iskaalso gaar ah lugaha inta aad sariirta ku jiiftid si looga hortago dhiiga oo xinjirooba.
- Waxa laga yaabaa in shaqaaluhu ku baraan sida loo qufaco, sida xoog loogu neefsado iyo sida loo isticmaalo neef-cabire (spirometer) ku dhiirigaliya. Neef-cabire ku dhiirigaliya waa qalab loo isticmaalo inuu kaa caawiyo in aad si xoog leh u neefsatid. Jimicsiyadaasi waxay caawinaad ka geystaan furitaanka marinada hawada ee sambabada iyo ka-hortagga numooniya (pneumonia). Haddii meel ah caloosha lagaa jeexay, saar barkin ama buste la laabay meesha lagaa qalay si ay u taageerto marka aad si aad ah u neefsanaysid ama qufacaysid. Samee jimicsiyadaa 1 ilaa 2 saac kasta inta aad soo jeedid.
- Waxa lagu siin doonaa daawo si loo ilaaliyo xanuunkaaga. U sheeg kalkaalisada hadddii xanuun ku hayo.
- Tuubada la galiyay xididkaaga (IV)/faleebada waxa loo isticmaali doonaa in lagugu siiyo daawo iyo dheecaano ilaa aad ka awoodid inaad si fiican wax u cuntid oo u cabtid. Waxa laga yaabaa in lagu siiyo gabalo ah baraf haddii aadan lallabo laheyn.
- Waxa lagu siin doonaa marka hore cabitaano saafi ah ama cad ka dibna si tartiib ah ayaa laguugu celin doonaa cuntada caadiga ah.
- Faashadda waxa laga qaadi doonaa meesha la qalay, maalinta ku xigta qalitaanka. Waxa laga yaabaa in meesha lagaa qalay ay leedahay:
 - ▶ Tolmo iskeed u milanta ama u baaba’aysa.
 - ▶ Qabatooyin/sharootooyin kuwaasoo badanaa lagaa saari doono dhawr maalmood qalitaanka ka dib.
 - ▶ Qabatooyinka “Steri-strips” iskood ayay u soo dhici doonaan 7 ilaa 10 maalmood gudahood.

- If you have a vaginal hysterectomy, you will not have an incision.
- For your safety, when you leave the hospital, you will need to have an adult family member or friend take you home. You should have someone stay with you for at least the first 24 hours you are home.

At Home

- Take your medicine as directed.
- Schedule a follow-up visit with your doctor. You will need to see your doctor in 4 to 6 weeks.
- Wash any incisions gently with soap and water and pat dry. You may take a shower or sponge bath, but do not take tub baths.
- A small amount of vaginal discharge is normal for 2 to 4 weeks after surgery. Change the pad every few hours. Wash the vaginal area with soap and water and pat dry.
- **Do not** put anything in your vagina until your doctor checks you.
 - ▶ **Do not** douche.
 - ▶ **Do not** have sexual intercourse.
 - ▶ **Do not** use tampons.

Activity Limits

- **Limit** your activities for 4 to 6 weeks.
- **Do not** lift over 10 pounds for at least 2 weeks.
- You may do light housework such as washing dishes and cooking.

- Haddii laguu sameeyay saarid ilmo-galeen oo la soo mariyay hoosta haweenayda (vaginal hysterectomy), ma lahaan doontid meel lagaa jeexay.
- Ammaankaaga daraadii, marka aad cisbitaalka ka baxaysid, waxa aad u baahan doontaa qof weyn oo elhelka ah ama saaxiib guriga ku geeya. Waa in qof kula joogo ugu yaraan 24-ka saacadood ee ugu horeeya ee aad guriga joogtid.

Guriga

- Dwoooyinkaaga u qaado sida laguu sheegay.
- Dhakhtarkaaga ugu tag booqasho la-socod ah. Waxa aad u baahan doontaa inaad aragtid dhakhtarkaaga 4 ilaa 6 todobaad gudahood.
- Si tartiib ah wixii ah meelo la qalay ugu dhaq saabuun iyo biyo oo taabasho tartiib ah ku qalaji. Waad qaadan kartaa qubeys istaag ah ama qubeys aad is marinaysid tuwaal ama shukumaan qoyan laakiin ha qaadan qubeys lagu fadhiisanayo saxanka qubeyska.
- Xoogaa yar oo ah dheecaan ka yimaada hoosta haweenayda waa caadi mudo ah 2 ilaa 4 todobaad qalitaanka ka dib. Beddel suufka dhawrkii saacadood kasta. Biyo iyo saabuun ku dhaq hoosta haweenayda oo taabasho tartiib ah ku qalaji.
- **Waxba ha** galin hoostaada ilaa dhakhtarku ku baaro.
 - ▶ **Ha ku** furin biyo xoog leh.
 - ▶ **Ha sameyn** galmo.
 - ▶ **Ha isticmaalin** suufka galiska ah.

Xadka Firfircoonda

- **Yaree** firfircoondaada mudo ah 4 ilaa 6 todobaad.
- **Ha qaadin** wax ka culus 10 rodol ugu yaraan 2 todobaad.
- Waad sameyn kartaa shaqo guri oo fudud sida dhaqista saxamada iyo cunto karinta.

- **Do not** do strenuous activities, such as vacuuming or exercising for at least 2 weeks.
- **Do not** drive for 2 weeks, but you can ride in a car for short trips.
- Go up and down stairs slowly, one step at a time.
- Take walks. Starting with short distances. Slowly increase how long and fast you walk.

Other Issues

- If your ovaries are taken out, you may have signs of menopause such as hot flashes, vaginal dryness or mood changes.
- It is common to have many feelings after surgery. You may feel sad, fearful, nervous or angry. Share these feelings with your loved ones and friends to help you cope as you recover. If the sadness does not go away after a few weeks, talk to your doctor.
- Your looks will not change after this surgery. There are no physical changes except that you may have a scar from your incision.
- Your surgery should not affect your ability to have sex or the way you or your partner feel while having sex. Ask your doctor when you may resume sexual activity and discuss any concerns you may have about sex.

Call your doctor right away if you have:

- Shaking, chills or a temperature over 101 degrees F or 38 degrees C
- An incision that is swollen, red, has drainage or comes apart

- **Ha sameyn** hawlo adag, sida faakiuumka ama jimicsi ugu yaraan 2 todobaad.
- **Ha kaxeyn** baabuur mudo ah 2 todobaad, laakiin waxa aad raaci kartaa baabuur marka safarku gaaban yahay.
- Si tartiib ah u isticmaal jaranjarada/salaanka, hal jaranjaro halkii mar.
- Samee socod. Ku bilaw socod gaaban. Si tartiib ah u kordhi fogaanta iyo dhakhsaha socodkaaga.

Arrimo Kale

- Haddii lagaa saaro ukun-sideyaasha, waxa laga yaabaa inaad yeelatid calaamadaha dhalmo-dayska sida dareen gubasho ah, qalal ah hoosta haweenayda ama isbeddello ah niyadda.
- Waxa caadi ah in aad yeelatid dareen kala duwan qalitaanka ka dib. Waxa laga yaabaa inaad dareentid murugo, cabsi, walwal ama xanaaq. Dareenkaa la wadaag dadka aad jeceshahay iyo saaxiibada si lagaa caawiyo inaad maareysid dareenkaaga inta aad bogsanaysid. Haddii murugadu aanay kaa tagin dhawr todobaad ka dib, la hadal dhakhtarkaaga.
- Araggaagu ama quruxdaadu isma beddeli doonto qalitaankan ka dib. Ma jiri doonaan wax ah isbeddello jirka ah marka laga reebo nabar aad ku yeelato meesha lagaa qalay.
- Waa inaan qalitaanku waxba ka beddelin awooddaada inaad yeelatid galmo ama dareenka aad leedahay ama uu leeyahay wehelkaaga marka aad galmo sameynaysaan. Weydii dhakhtarkaaga goorta aad bilaabi kartid galmada, isla markaana kala hadal wixii walaac ah ee aad ka qabtid galmada.

Wac dhakhtarkaaga isla markiiba haddii aad qabtid:

- Gariir, qarqaryo ama heerkul ka sareeya 101 darajo F ama 38 darajo C
- Meeshi la qalay oo bararsan, cas, ama leh dheecaan ama kala fuqday

- Bleeding from your incisions
- Pain, warmth or tenderness in your legs
- Heavy vaginal bleeding, soaking 2 to 3 pads in one hour
- Vaginal drainage with an odor
- Trouble urinating
- Burning when you urinate or feel a need to urinate often
- Skin that is itchy, swollen or has a rash
- Severe mood swings or feel depressed

Call 911 right away if you have trouble breathing all of a sudden or have chest pain.

Talk to your doctor or nurse if you have any questions or concerns.

- Dhiig-bax ka imanaya meesha lagaa qalay
- Lugahaaga oo xanuun, diirimaad ama danqasho leh
- Hoosta oo dhiig badan ka socdo, kaas oo qoynaya 2 ilaa 3 suuf hal saac gudaheed
- Dheecaan ur leh oo hoosta ka yimaada
- Kaadida oo dhib ah
- Gubasho marka aad kaadinaysid ama baahida kaadida oo soo badatay
- Maqaarka oo ku cuncuna, barara ama finan leh
- Isbeddelo niyadda ah oo daran ama dareen ah murugo ama diiqad

Wac 911 isla markiiba haddii si kedis ah neefsashadu dhib kugu noqoto ama aad xanuun ku leedahay laabta.

La hadal dhakhtarkaaga ama kalkaalisada haddii aad qabtid su'aalo ama walaac.
